

Web Technologies WS 2011/2012

Assignment 2

Please submit your results into the “Shared Domain” section (in your group wiki and folder).

If you have questions regarding the assignment or encounter difficulties then please use the L²P forum or visit us Wednesdays from 2 p.m. to 4 p.m. in Room 6010.

Task 2.1: Prepare a project presentation (Deadline 28.11.2011, 08:00)

Your group will present the idea of your project in the lecture on November 29th.

- a) Prepare a short presentation to advertise your project (about 3 min)
- b) Think of why other students would like to use your product/website/application.

Task 2.2: Student talk (Deadline 27.10.2011, 08:00)

Now, that you have built groups and found an idea for a project, think of Web Technologies that you want to use to implement your project or that you have experience with and you want to share with the course participants. Technologies could be server- or client-side frameworks, emerging technologies, or what you think can fit in a Web Technologies course.

- a) Choose 3 different technologies, you would like to present in a 30 minutes group presentation and describe each one briefly.
- b) Rank your ideas from 1 to 3 so that we can see what you would like most when we assign the topics.

We will assign topics in the first group discussion sessions on Wednesday November 2nd. The student talks will start on December 1st. Once you'll be assigned a topic, please start to prepare your talk. We will give you the exact date of your presentation. Also, we will invite you to present us your slides/demos about one week before your talk.
